Restring

Most players give serious consideration when selecting a badminton racquet, demanding the best frame material, searching for the best combination of head size, weight, balance point, stiffness to suit individual needs. Yet it is surprising how little importance some players place on their strings.

Proper stringing is critically important to your racquet performance and life-span. A racquet can only play as good as it is strung.

**Racquet**

What is WOVEN?
* Woven is composed of 800D hi-modulus graphite and fiber glass, which makes the racquets more durable and comfortable.
* Woven is a kind of weave of 90 degree, which enables the racquets bear great force of more than 30lbs.
* Woven makes the racquets well-balanced, which is much better than the conventional materials.
* Woven is composed by hi-technology and contains no solvent, which greatly increase the balance of the racquets.

Experience is important, but please remember: “Suitable, is the best.”

SOTX racquets share 180-400 days guaranty term of quality**
